Education

Workintech, *Data Analyst & AI Program*
3months - 432 hours - 70 + projects - 2026

Okan University — M.A. Clinical Psychology
2017 – 2019

Istanbul Bilgi University, *Psyhology*
2011- 2016

Languages

English, *Advanced*
Spanish, *Beginner*

Certificates

Data Analyst & AI, Workintech, 07.2026

Data Analytic Bootcamp, Udemy, 06.2023

Cansu Ayaz

Data Analyst

Building hands-on experience in data analysis using SQL, Python, BigQuery, and Power BI through real-world projects. Currently completing the Workintech Data Analyst & AI program, with a focus on data cleaning, exploratory data analysis (EDA), KPI analysis, data visualization, and data-driven decision-making. Bringing analytical thinking, research skills, and an understanding of human behavior from a professional background in clinical psychology into the field of data analytics.

SKILLS

Programming & Data Analysis: SQL, Python, Pandas
Databases & Tools: BigQuery, Jupyter Notebook
Data Visualization & BI: Power BI, Looker Studio
Analytics: Data Cleaning, EDA, KPI Analysis, A/B Testing, Basic Statistics
Additional Tools: dbt, Scikit-learn
Soft Skills: Analytical Thinking, Problem Solving, Teamwork

PROJECTS

LinkedIn Job Postings Data Analysis | SQL, BigQuery, dbt, Power BI, Python, ML GitHub

- Cleaned and transformed a dataset of 120K+ LinkedIn job postings using BigQuery and dbt, building staging, intermediate, and mart layers to create analysis-ready data models.
- Developed interactive Power BI dashboards to analyze industry, company, salary, experience level, and job engagement metrics; examined view-to-application conversion and salary differences.
- Applied correlation analysis and ANOVA hypothesis testing in Python to evaluate the statistical significance of relationships observed in Power BI.
- Built a regression model to predict salaries based on job posting characteristics and evaluated model performance using MAE and R^2 metrics.

E-Commerce Data Analysis & Business Insights | Power BI, BigQuery GitHub

- Cleaned and analyzed e-commerce data using **Power BI** to evaluate sales performance and key business KPIs.
- Examined sales trends and business performance through interactive visualizations, generating insights to support data-driven decision-making.

Steam Game Data Analysis & Player Satisfaction Prediction | Python, Power BI, SQL, ML GitHub

- Analyzed 15M+ Steam user reviews and millions of player records to explore how playtime, user behavior, and game characteristics relate to player satisfaction.
- Performed EDA, correlation analysis, and hypothesis testing in Python to identify meaningful patterns across game genre, price, player experience, and popularity.
- Developed an interactive Power BI dashboard to monitor player

behavior, satisfaction, and game performance KPIs.
- Built a classification model to predict positive and negative user reviews and evaluated its performance using standard machine learning metrics.
- Translated findings into actionable recommendations aimed at improving player engagement, retention, and overall satisfaction.

EXPERIENCE

Workintech -*Data Analyst Traniee* 2026- 2026

- Developed hands-on experience in SQL, Python, BigQuery, Power BI, and data visualization through an intensive Data Analyst & AI program.
- Worked on real-world datasets to perform data cleaning, exploratory data analysis, KPI analysis, and statistical analysis.
- Translated analytical findings into clear visualizations and data-driven business insights. .

Adel Consulting Center— *Clinical Psychologist* **2023 – Present**

- Provide structured psychological assessment and psychotherapy services while maintaining systematic case documentation and treatment planning.
- Conduct psychotherapy processes involving structured follow-up, treatment planning, and peer supervision.
